# Ethan Miller

**SOFTWARE ENGINEER • WEB DEVELOPER**

## PROFILE

Software professional experienced in back-end development. Brings skills in troubleshooting, communication, and knowledge of industry best practices. Looking to put knowledge and abilities to good use in technical position focused on meeting team goals.

## PERSONAL DETAILS

**Address**

1310 Leeward Lane, Wylie, TX, 75098

## CONTACT

## WORK EXPERIENCE

### DEVELOPER/ SR DEVELOPER (L3)

**AMERICAN AIRLINES** Jan 2022 – Present

- Produced robust, accurate code that minimized production issues.
- Evaluated and improved development work of other developers on team, working to provide training, constructive criticism, and knowledge transfer.
- Served as Testing & Automation instructor for American Airlines Bootcamp.

### ASSOCIATE DEVELOPER (L2)

**AMERICAN AIRLINES** May 2021 – Jan 2022

- Built fully automated CI/CD pipelines on Azure DevOps for containerized applications using Docker, JFrog CR, and Rancher.
- Deployed a centralized logging environment(ADX, MiNiFi, Cloudera) which gather log data from docker containers and Kubernetes resources.
- Configured a centralized monitoring environment(Dynatrace, Grafana) which gather system metrics as well as docker run-time metrics.

### ASSOCIATE PROGRAMMER (L1)

**AMERICAN AIRLINES** Jan 2020 – May 2021

- Built framework around Cucumber for E2E testing. Integrating regression tests into automated CI/CD pipeline.
- Provided support for defects and sunsetting legacy monoliths to a microservice oriented architecture.
- Use of Load Testing tools (Load Runner, JMeter, Performance Center) to identify application performance, determine optimal JVM arguments, and implement resource thresholds to trigger auto-scaling.
- Participated in on-call rotation for eTDS production support in case of application failures reported by AIOps alerting (Moogsoft).

### BOOTCAMPER

**IMPROVING** Sep 2019 – Dec 2019

- 12-week paid software development training program.
- Concepts covered include Object Oriented Design, SOLID Principles, TDD, Agile/Scrum.
- Technologies learned include Java, Spring, Hibernate, SQL, HTML, CSS, JavaScript, React, Angular.

### CLOUD:

- Containers (Docker)
- Cluster Management (Kubernetes)
- Twelve-Factor App
- Cloud Foundry
- Auto-scaling

### MONITORING & INSTURMENTATION:

- Dynatrace
- Alerting (Moogsoft/xMatters)
- Logging (Elasticsearch/Logstash/Kibana)

### DEVOPS:

- Build & Deploy (Maven, Gradle)
- CI/CD Pipelines (Azure Pipelines)
- Version Control (Git/Azure Repos)
- Code Quality (Coverity, Sonar)
- Agile Ceremonies (Ralley, Azure Boards)

### BACK-END SKILLS:

- Java
- Spring, CamelAPI, Hibernate
- Software Design, CLI, Data Serialization
- MySQL, MongoDB

### SYSYSTEM DESIGN AND ARCHITECTURE:

- Domain Modeling, Sequence Diagrams
- N-Tier Architecture
- Microservices

### AUTOMATED TESTING:

- Integration Testing (Cucumber)
- Unit Testing / TDD (JUnit)

### PERFORMANCE TESTING:

- Service Virtualization (DevTest)
- VuGen Scripts (Load Runner, JMeter)
